

U.S. SUBMERGENT
INSIDER

One Truck, One Tool

23-Foot Deep Wet Well Cleaned While in Operation

Tallahassee's lift station was due for scheduled maintenance, needing both FOGs on the surface and sand and grit on the bottom removed. Equipped to switch between vacuum and downhole pumping, USST's Combination³[®] equipment allows crew to remove debris from water surface and structure bottom without additional equipment or repositioning.

Check out our Field Supervisor's insights on this confined space entry job, as well as how we completed the project ahead of schedule, while remaining in full operation.
