

The premier service provider for cleaning wet infrastructure

May Newsletter

Hi Friend,

USST is pleased to announce that another Combination^{3®} truck has been added to the Florida branch fleet to increase our service capability and is already in use; Our crew removed 45 cubic yards of accumulated material from a system in Jasper, Florida while the facility remained in full operation; We're keeping safety in mind as the warmer months of the year approach us.

New truck onsite!

U.S. Submergent Technologies recently added a new model 949 truck to the Combination^{3®} fleet. Here it is mobilizing to a jobsite.

Click [here](#) to learn more about our Combination^{3®} technology and why it's more than just another vac truck.

USST's new model 949 Combination^{3®} truck

clothing.

In 2014, over **2,600** people suffered from heat related illnesses and **18** people died from heat stroke or similar causes according to [OSHA](#).

When outside in warm conditions it's important to remember to:

- Drink water every 15 minutes
- Take it easy on your first few days of work, gradually increase your workload as you become acclimated to the heat
- Rest in the shade to cool down
- Keep an eye on your fellow workers for signs of heat exhaustion

Remember, new workers, temporary workers, or those returning to work after at least a week off might be at greater risk to heat related illnesses.

Stay safe out there!
